Inhaltsverzeichnis

1   test

The quick brown fox jumps over the lazy dog

Die von Maas vorgeschlagene Standartisierungsmodell [Maa15, S. 12] wurde in die Managementbereiche nach dem Funktionsmodell [Tho14, S. 35–60] unterteilt. Dabei wurde die Funktionskopfzuteilung beachtet[1].

p3 test

2   Example

For links see the aptly named chapter at the end.

2.1   Citations

Citations   are very important like for a book[2] or for a website[3]. You find them in the *citations.bib* file.
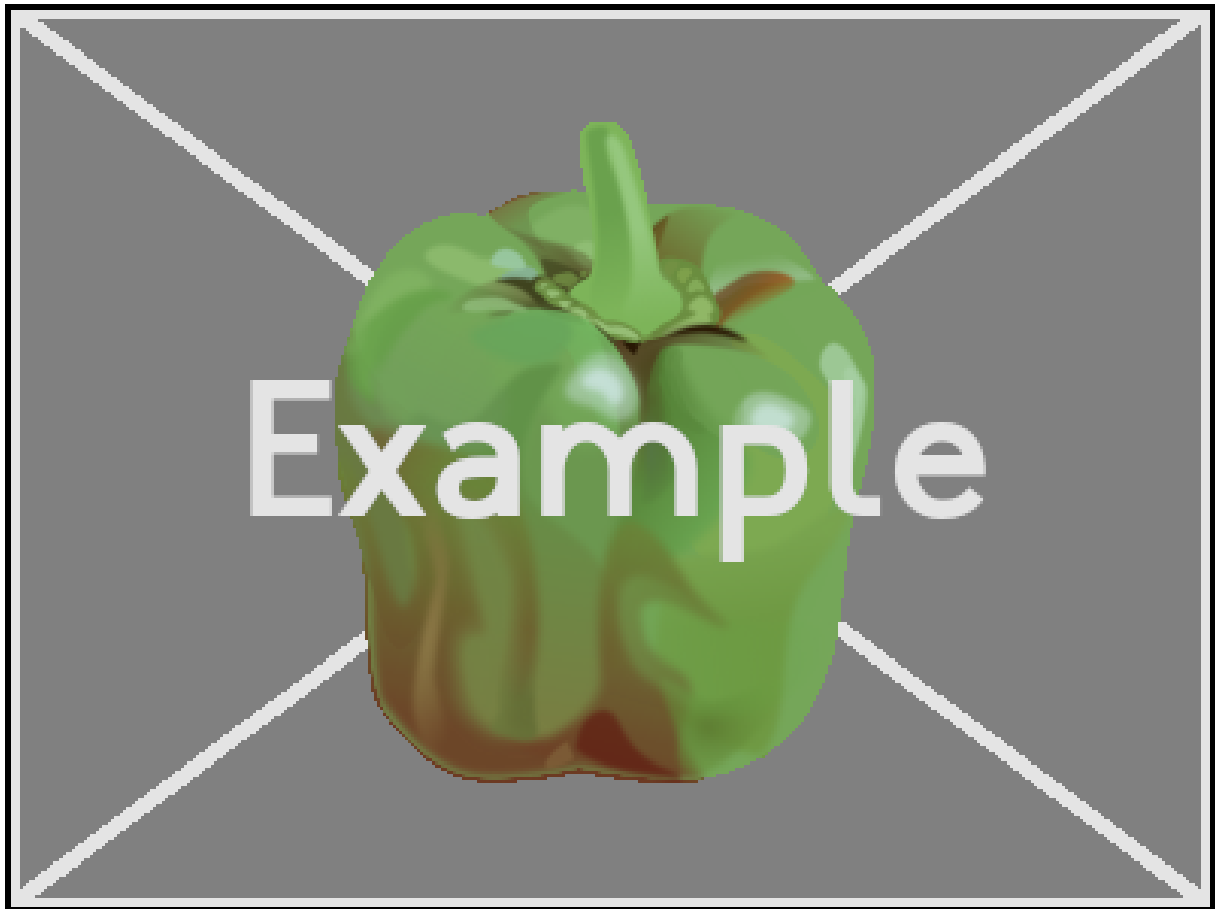

2.2   Figures

Abbildung 1: One figure centered full width
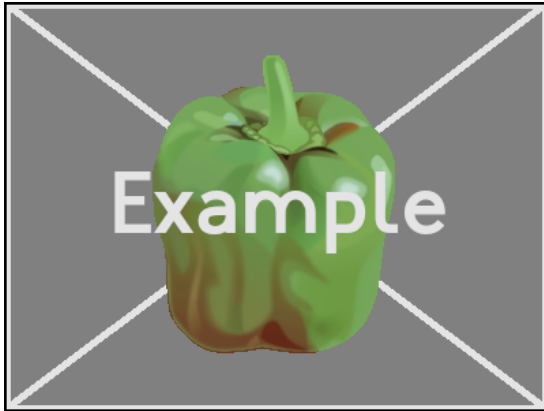

---

[2]Pul02.
[3]qsw16.

Abbildung 2: Left figure

Abbildung 3: Right figure

Notice how we can setup a *label* and then reference the figure 1 on page 7 with the *ref* command.

2.3   Tables

A title	B title	C title
A	B	C
A	B	C
A	B	C

Tabelle 2: Simple table with lines

2.4   Lists, Bulletpoints and Enumerations

This itemize list is default.

- A

- B

- C

This enumerate list has *noitemsep* added.

1. A
2. B
3. C

2.5   Links and References

A label works great to reference something inside the document like section 2.1 the citations on page 7. For more freedom to navigate consider a hypertarget and hyperlink like this chapter title. For external web-pages use https://en.wikibooks.org/wiki/LaTeX/Labels_and_Cross-referencing but a citation would be better suited most of the time.

2.6   Glossary

This is a test if the glossaries package works as expected. Remember that in TeXstudio you have to generate the glossary with F9 (makeglossaries command) first before it will show up.
